Professional Experience

Solution Architect | KPIT Technologies GmbH, Germany | July 2019 – Mar 2021

Domain: Advanced Driver Assistance System (ADAS)

Project-1: Central Sensor Cleaning Manager on xPAD

- **Description:** Process, Prioritize Blockage info and command Actuators for cleaning of sensors like LiDAR, Camera.
- **Project Management Methodologies:** LeSS (https://less.works), Scrum, TDD, Pair Programming
- **Technologies:** C++ 14, Bazel, Franca+ IDL (Interface Definition Language), ROS (Robotic Operating System), Some/IP (Scalable service-Oriented MiddlewarE over IP), Git, Classic AUTOSAR (Signal based), Adaptive (Service Based), ARA (Autosar Runtime for Adaptive Applications) COM.
- **Responsibilities:** Analyze requirements from CodeBeamer (ALM Platform), Design, develop and unit test the Adaptive (Service Based) applications as per AUTOSAR and industry standard practices, guidelines, Pair Review Codes, Documentation.

Project-2: Cloud DevOps Setup and Automation

- **Technologies:** AWS (S3, EC2, Cloud Formation, IAM, Config), Groovy script, GitLab Admin, JIRA Admin, Bazel, CMake, Git, Python 3, Boto3, Docker, Docker Compose, Jenkins, Flask, Windows Powershell, Plantuml for UML drawings
- **Responsibilities:** Setting up CI pipeline, Cloud Automation, Modifying Groovy based Shared Library

Senior Technical Architect | Cognizant, India | Jan 2019 –May 2019

Architect | Cognizant | Sept 2013 –Dec 2018

- **Domain:** Banking & Finance Systems (Investment Banking)
- **Sub-Domain:** Trading Technologies, Market Connectivity and Market Data Applications
- **Environment:** Low Latency, Distributed Applications and Frameworks Development
- **Influencing:** Agile Methodologies, Test Driven Development, CI-CD
- **Technologies:** C++ 11/14, STL, Boost, CMake, Fisheye Crucible, JIRA
- **Responsibilities:**
  - One of the first few key technical members, who initiated and setup the account
  - Helped build teams by contributing to recruitment, KT and overall management processes
  - Accountable for overall quality of the code and delivery via automatic unit test frameworks and extensive reviews
  - Enforcing coding guidelines, use of standard library and best practices
  - Bringing in Automation in the development process
  - Analyzed 20+ Stock Exchange specifications - used for estimation and building design
  - Built generic modules (Template Meta Programming) which were extensively used across multiple venue development
- **Stock Exchange Messaging Formats:** FIX, ITCH, TIP, FAST, many proprietary ones.

Sr. Software Engineer | IBM (ISL) | Mar 2010 –Oct 2013

- **Domain:** Virtualization and Endpoint Management
- **Description:** IBM Endpoint Manager offers a unified management platform that automates and streamlines systems and securities management for endpoints and servers. Using TEM, Administrator of an enterprise can analyze vulnerabilities, automatically remediate all network endpoints, enforce configuration policies across entire network, distribute and update software packages, view, modify and audit properties of networked client computers. It is based on patented BigFix technology
- **Technologies:** BigFix Technologies, Relevance language, RTC, RSA, Core Java, J2EE, Javascript, Perl Script, Eclipse Plugin Development on Solaris, Linux, Windows
- **Responsibilities:** Engage in development and maintenance of products (1) TEM for OS Deployment (2) IEM for Server Automation (i.e. middleware development) (3) Tivoli Provisioning Manager – Automation Package Development Environment (4) POC for Service Lifecycle Management

Lead Engineer | Symphony | Feb2008 –Mar 2010

- **Domain:** Backup & Restore Application Dev
- **Responsibilities:** Fixes, enhancements using C++, Java for Client Application on Windows and Macintosh

Tech Lead | Wipro | May 2004 –Sept 2007

- **Domain:** Semiconductors and Consumer Electronics
- **Project-**1: Uploader Abstraction Layer – C++ and JNI based abstraction layer between Java User application and a DLL used for uploading / upgrading / cloning the firmware on USB/FireWire SATA bridge device
- **Technologies:** C++, Core Java, MFC on Windows, XCODE-COCOA on Macintosh, WinCVS, Bugzilla
- **Responsibilities:** Team Management, Design, Development of UAL
- **Project-**2: Device Drivers for OXUSB95x devices – USB-to-Serial bridge devices
- **Responsibilities:** For OXUSB950 (1-1port) and OXUSB954 (1-4 ports) - implementation of Bus driver and Function driver. Bus driver used only for OXUSB954. Function drivers does main tasks of read/write/handling IOCTLs/PNP IRPs. To show serial ports we added Window Registry entries. Drivers were tested using WHQL and COM applications like HyperTerminal/RealTerm/COM7.6.
- **Technologies:** C, DDK for XP/2K Windows

Software Engineer | CygNET | Mar 2001 –Apr 2004

- **Responsibilities**: Application Development for WeighPad, MailPad (short handheld devices)
- **Technologies**: Hyperstone-C, VC++, VB on Orbita, DOS, Win9x/2000/XP

Education, Certifications & Awards

"Best Emerging Leader" Award, 2018, Cognizant
PL1 Certification, 2016, Cognizant
Certified Scrum Master, 2015, Scrum Alliance
Certificate - ITIL Foundation, 2012
PGDBM, 2010, ICFAI
Certificate -Embedded Systems, 2003, IIT Bombay
Bachelor of Engineering (Computer Science), 2000, Pune

Interests

Meditation
Social Welfare
Singing, Sketching, Drawing
Listening to Many Music forms
